Value

£250k

Duration

8 Weeks

Description

Office & Car Park Services

Key Features

New ventilation was provided to the car park area which incorporated a new extract air handling plant. A distribution of galvanized high level ductwork was installed complete with vertical droppers. A number of high and low level extract grilles have been installed. The system is controlled via a number of Co2 sensors positioned throughout the area. Natural fresh air is provided to the space via external louvres.

Heating to the area is provided by a number of high level gas fired radiant heaters. A time clock controller has been provided together with local temperature sensors to maintain a comfortable working area.

Within the office space new toilet and tea point domestic, public health and ventilation services have been provided.
